

You're an important part of our future. Hopefully, we're also a part of yours! At B. Braun, we protect and improve the health of people worldwide. This is also our vision for IT. You see technology as an opportunity, and you develop solutions that secure our business in the long term, we would like to implement the digital transformation of B. Braun with you. With fresh ideas, drive and team spirit, we are working to launch the medical technology of tomorrow and safeguard the healthcare of the future. Together. That's Sharing Expertise.

Senior IT Project Manager (f/m/d) Sustainability

Reference Code DE HBo 924-85685

At our headquarters in Melsungen, we are looking for an experienced IT Project Manager (f/m/d) to support us in achieving our sustainability goals and implementing the EU requirements in a global matrix organisation.

Duties and responsibilities

- Responsibility for the management of complex, interdisciplinary IT projects in the area of sustainability in a global matrix organisation
- From planning through to project completion, you will take responsibility for all aspects of the project results and be responsible for the budget
- Regular communication with internal and external stakeholders to communicate project progress, status and results, including at top management level
- You establish the link between business and IT
- Risk management at project level, within the framework of a programme
- Regularly analyse and report on the project
- Support with project interfaces in other sub-projects
- Collaboration with other areas of B.Braun on a global level
- Supporting the group-wide implementation of the sustainability strategy and goals
- Collaboration in the professionalisation of (IT) sustainability management

Professional competencies

- Successfully completed studies in the field of computer science or engineering, preferably with a specialisation in sustainability or a comparable other qualification
- MBA in the field of digital business transformation is a plus
- At least 3 years of professional experience in complex projects as a project manager
- In-depth project management knowledge, also in hybrid project management, PMP®/IPMA Level B certification a plus and experience in agile methods (SCRUM, Kanban,...)
- Experience in the establishment and global implementation of the European Sustainability Reporting Standards (ESRS) within the Corporate Sustainability Reporting Directive (CSRD)
- Knowledge of requirement management and data modelling is a plus
- Knowledge of planning and production processes in a manufacturing company in the manufacturing industry, ideally medical technology desirable
- Professional handling of MS Office 365, MS Project, JIRA

Personal competencies

- Fluency in German and English, other foreign languages are an advantage
- You enjoy responsibility and working in complex structures with different, non-technical departments
- You are characterised by flexibility, assertiveness and the ability to get to the heart of complex issues in a generally understandable way
- You are a confident presenter, even in front of higher management bodies, and can convince others
- Strong teamwork and communication skills are among your strengths

What we offer

Become part of a corporate culture that actively promotes constructive exchanges between colleagues, customers and partners. Work with us to improve people's lives in the long term. We can offer you interesting, varied tasks and excellent opportunities for advancement, as well as an attractive salary with extensive benefits, all within a dynamic family-owned company.
