NOTHING TO FEAR – A GUIDE TO COMBINE DCB AND DES IN HYBRID PCI

Anchorperson: A. Colombo
Moderator: B. Scheller
Discussants: K. Bonaventura, P. Ong, M. Godin

Join if you want to:

- learn how to combine usage of DES with DCB with the goal to limit stent length and allowing the potential for vessel remodeling following usage of DCB
- receive an in-depth insight into the latest clinical data on drug-coated balloon usage in ISR, de-novo and bifurcation indications
- learn more about your options to use drug-coated balloons in ACS patients

TOPIC	SPEAKER
The hybrid approach in PCI - A guide to treat lesions with the hybrid approach	K. Bonaventura
A guide to use DCB in ACS patients	P. Ong
A guide to use DCB in de-novo lesions and bifurcations	M. Godin
